

# Protect private data to earn public trust.

**We are moving government forward  
with smarter solutions for  
Cybersecurity**

## Challenge

Governments are navigating increasingly complex cyber threats, and must safeguard public data.

- New tech brings new risks
- Global threats are escalating
- The public data footprint is growing significantly

## Solution

Maximus offers full-spectrum cybersecurity services and technologies, enhanced by security leadership.

- Active threat hunting
- Penetration testing
- Rapid incident response

## Benefits

Strengthen your cyber-resiliency with 360-degree protection for systems, data, and operations.

- Proactive cybersecurity
- Monitor systems 24/7, 365
- Security team on demand

Secure your most sensitive public data with strategic guidance from Maximus Canada Cybersecurity Services.

We don't wait to defend: we act now. Maximus proactively probes where your vulnerabilities are today, to protect you against attacks tomorrow.

# Proactive cybersecurity to find and manage vulnerabilities before your data is at risk.

Maximus provides a full cybersecurity solution to keep public data safe.

## Real World Application | Real Results

### WHAT |

We find the gaps in your technology, and assess your people and processes.

### HOW |

We conduct penetration testing, including those required by local, provincial, or Federal standards.

### NOW |

We close the gap. Use our recommendations to address specific vulnerabilities.

### WOW |

Stay ahead of emerging threats, and mitigate risks **before** they become security incidents.

## Why Maximus?

Maximus delivers a complete suite of cybersecurity solutions. Our professional teams are led by seasoned experts who are ready to support your organization whenever needed.

Our connected teams of security thought leaders empower jurisdictions of all sizes with world-class expertise and industry leading insights.

“

Cybersecurity is about safeguarding the trust and privacy of the people we serve. As stewards of sensitive information, we have a responsibility to ensure that personal data is protected with the same diligence and care as any public resource.

Veronica Mustoe  
Vice President, Privacy and Security
